Total – bank and cash balance \$XXX

President's Report

Bob Howard related concerns from a Sudbury R/C club newsletter about interference occurring in the 2.4Ghz band, as a result of multiple devices (WiFi boosters, Wireless phones, Video Tx) using this frequency. Bob will be forwarding the article.

Field Report

Tom stated the field was in pretty good shape. A big thank you to Deven Stoyles for arranging for the repair of our tractor through Valour HS. Repairs are underway and should be completed shortly. It was agreed that using a cultivator to remove the weeds from the runway would be a good idea. Stefan and Ken will decide on a day and let the club know so we can arrange a work party.

Flying Instruction

It looks like we have three plus students this year.

Discussions of Interest

- Members in attendance felt that it would be a good idea to maintain the website, as a way to attract new members and for promoting our hobby.
- A Funfly will be held on June 20th (rain date the 21st). It will be an informal event consisting of flying, a barbeque lunch/supper (bring your own food).
- It was a great evening for a few flights at the Pembroke Airport. There was a helicopter, multicopters and even one or two airplanes. :-)

Next Meeting.

The next meeting will be June 3rd 2015.

The meeting was adjourned at 20:40.
